

WELCOME TO LITTLE KEYNOTES

BY

Piano Classes
for ages 4-6

WHERE LITTLE FINGERS MAKE BIG MUSIC

Where the world of piano unfolds through creativity and joy, tailored specifically for 4-6 year-olds. Our beginner piano program is a musical adventure that sparks curiosity and sets the stage for a lifelong love of music.

TOPIC-BASED LEARNING

Our topics appeal to our young learners and help them to discover the power and possibilities of music and the piano, from elephants loudly stomping low, to butterflies softly fluttering up high.

PERFORMERS

Our Littles perform every lesson! Structured performance time at the end sees all students performing both solo and as an ensemble.

MUSICAL ELEMENTS

We discover what the elements are that make music and then match them to our topics! We introduce each musical element with a game and a song, often using familiar nursery rhymes to adapt high and low, fast and slow, loud and soft, and various articulations.

LISTENING

In our classes we listen and move to a variety of genres of music. This gives exposure to different styles and develops an appreciation for expression and communication through music.

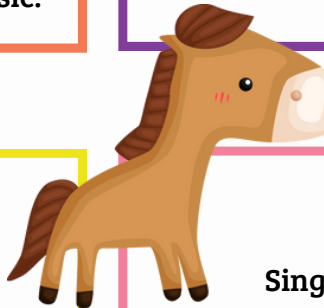

IMPROVISATION

Improvisation forms a large part of the learning process and enables Littles to lead their own creativity and expression.

GAMES

Games help to introduce and consolidate concepts and skills! Each game aims to embed learning, give students an opportunity to collaborate, and be super fun!

SINGING

Singing in the early years is a key tool for learning and our Littles sing the songs that they learn to play. We also encourage learners to sing finger numbers and letter names.

FINE MOTOR SKILLS

Manipulatives and activities develop the fine motor skills needed when playing the piano. We only encourage 5-finger playing when students are physically ready.

RHYTHM & PULSE

Every lesson has activities that engage learners with rhythms: listening to them, tapping them, creating them, reading them, through which they develop an excellent sense of pulse!

GROUP MUSIC-MAKING, INDIVIDUAL PROGRESS

Our innovative strategies for differentiation and cyclical learning structures mean that whilst our learners learn and play together, they are able to further challenge themselves when needed. This means that no learner is left behind nor held back. We cover every learning style through our delivery and ensure that every learner thrives.
